Koralla Kedhar

Chennai, Tamil Nadu | +91-8555866920 | Kk4380@srmist.edu.in | LinkedIn | GitHub

Education

SRM University, Kattankulathur — **Chennai, Tamil Nadu**
Bachelor of Technology (B.Tech)

NRI Junior College — **Guntur, Andhra Pradesh**
Intermediate (Class XII)

NRI Indian Springs School — **Guntur, Andhra Pradesh**
Class X

Skills

Programming Languages: C, C++, Python, Java, JavaScript

Web Development: HTML, CSS, Node.js, MySQL

Frameworks & Tools: Arduino, Flask, React (Basics), Git, VS Code

Concepts: IoT Systems, Computer Vision, Database Management

Experience

Event Coordinator — **University Events**
- Coordinated technical and cultural events by managing logistics, registrations, and participant communication.
- Worked with faculty members and student volunteers to ensure smooth execution of campus events.
- Developed leadership, teamwork, and event management skills while handling multiple responsibilities.

Volunteer – Lexposium 2025 — **SRM School of Law, SRMIST**
- Contributed to the successful organization of **Lexposium 2025**, which also marked the inauguration of the new SRM School of Law building.
- Assisted in coordinating event logistics, attendee management, and ensuring the smooth execution of the conclave alongside faculty and organizing teams.
- Participated in expert-led discussions on Judicial Reforms, Constitutional Morality, Artificial Intelligence & Cybersecurity, and Access to Justice, gaining valuable insights into contemporary legal and technological challenges.

Projects

Heart Disease Risk Prediction System (heartPredictML)
- Developed a machine learning application in Python to predict the likelihood of heart disease using patient health records and clinical features.
- Performed data preprocessing, feature engineering, and model training using Scikit-learn to improve prediction accuracy.
- Evaluated multiple classification models using performance metrics such as Accuracy, Precision, Recall, and F1-Score for reliable healthcare predictions.

Vox – Text to Speech [Live Demo]
- Developed a web-based text-to-speech application using Python and Flask to convert typed or imported text into spoken audio.
- Integrated Google Text-to-Speech with language and speech pace controls for convenient audio generation and playback.
- Deployed the application on Vercel with on-demand audio generation and a responsive browser interface.

CipherSense AI – Secure Messaging & Privacy Analyzer [Live Demo]
- Developed a cybersecurity application integrating secure messaging, sensitive-data detection, and text-risk classification using Python.
- Implemented AES-256-GCM authenticated encryption with Scrypt-based key derivation, local privacy analysis, and sensitive-data redaction.
- Integrated TF-IDF and Logistic Regression for text-risk classification, with Streamlit, Docker, and Vercel deployment support.

Achievements

- Member of university technical club and participated in coding competitions and workshops.
- Volunteered in social/community service events organized by SRM University.
- Coordinated peer-learning and study groups for challenging courses.
- Conducted Arduino/IoT demonstrations for school and college students.
